

LESSON - 21

CSS

**min(), max(),
clamp() & calc()**

1. min()

min() ka matlab hai – jo value chhoti hogi usko choose karo.

eg. -

```
.box {  
    width: min(50%, 300px);  
}
```

2. max()

max() ka matlab hai – jo value badi hogi usko choose karo.

eg. -

```
.box {  
    width: min(50%, 300px);  
}
```

3. clamp()

clamp() ek tarah ka range lock hai – minimum, preferred aur maximum value set karne ke liye.

eg. -

```
.box {  
    font-size : clamp(16px, 2vw, 24px);  
}
```

4. calc()

calc() ek maths function hai jo CSS me values calculate karne ke liye use hota hai. Isme tum $+$, $-$, $*$, $/$ (add, subtract, multiply, divide) ka use kar sakte ho.

eg. -

```
.box {  
    width : calc(100% - 50px);  
}
```
