

LESSON - 19

CSS Multiple Columns

Ye ek CSS feature hai jo ek content ko magazine-style layout me divide karta hai — yani multiple columns me text flow hota hai.

Jaise newspaper me text 2-3 columns me hota hai, waise hi web page pe.

Lorem Ipsum is simply dummy text of the printing and typesetting industry. Lorem Ipsum has been the industry's standard dummy text ever since the 1500s, when an unknown printer took a galley of type and scrambled.

It has survived not only five centuries, but also the leap into electronic typesetting, remaining essentially unchanged. It was popularised in the 1960s with the release of Letraset sheets containing Lorem Ipsum passages.

Many desktop publishing packages and web page editors now use Lorem Ipsum as their default model text, and a search for 'lorem ipsum' will uncover many web sites still in their infancy. Various versions have evolved over the years.

- Basic Properties :

1. **column-count** : Ye batata hai ki kitne columns me content split hoga.

eg : `column-count: 3;`

2. **column-gap** : Columns ke beech ka gap set karta hai.

eg : `column-gap: 40px;`

3. **column-rule** : Columns ke beech me ek line add karta hai.

eg : `column-rule: 2px solid red;`

4. **column-width** : Ek column ka minimum width set karta hai, aur browser automatically adjust karega kitne columns fit ho sakte hain.

eg : `column-width: 200px;`

5. **column-span** : element ko sabhi columns ke across full width me dikhana.

eg : `column-span: all;`
